Sunset Elementary

Sunset School first appears in the Fresno Unified School District directory in 1973-74. This school was originally a part of the Madison School District in the southwest area of Fresno and was created by the Madison School Board to care for the overcrowding in the Madison School. The site which is at 1755 South Crystal, was contiguous to the Fresno Unified School District at the extreme southwestern border.

The Sunset School serves the needs of children in grades K-6 living in the vicinity of the site. It was named by the Madison Board of Education, and the Fresno Unified School District Board continued the name when it was annexed.
